4/23/70

Dear Howard,

While thinkingx something else through, it suddenly came to my mind that what you are fuzzy onxthat John told you about the nurse and the handling of the Connelly fragments is all set forth in PM. He read it, asked to keep it long enough to read again, and in the light of his subsequent behavior, if he didn't copy it, which I now believe he did, he made extensive notes and duplicated the docs referred to. In any event, the are all in the appendix to PM, including even the FBI report on the State Trooper who handled.

In his letter to me, answered earlier today and copies sent you and Dick (to whom carbon of this), John says he doesn't want PM. Now it is here that he got much of his stuff, and the documents I showed him for a planned addition. It seems pretty obvious that if he doesn't want a copy in a letter in which he asks for all but my eye teeth, he has it.

In any event, if you are interested in the JBC fragments, I have the reports. I have all the JBC files, too.

Sincerely,
